Plumer Discusses Co-Operative Wheat Marketing

Tells Board of Trade How Wheat Pool Helping to Clarify Farmers' Marketing Problems

In an address given before the members of the Bassano Board of Trade last Wednesday noon, Sept. 25, Ben S. Plumer, Bassano farmer and a director of the Alberta Wheat Pool, told how that organization was solving the problem of marketing the farmers' wheat and helping them to get the full value for their product.

About thirty-five board members and visitors listened with keen interest for an hour while Mr. Plumer dealt with a number of important phases of co-operative marketing.

One important improvement brought about by the pool, said the speaker, was in obtaining certain amendments to the grain act which affected the inspection and grading of wheat. This, it was expected would result in the saving of a considerable sum of money for the wheat grower.

In the early part of his speech Mr. Plumer dealt briefly with the history of the wheat pool, its organization, its growth and development, and its present strong position in which it controls approximately half of the Canadian wheat crop.

Mr. Plumer mentioned a number of difficulties the wheat pool had met and overcome; how the pool had built country elevators to handle their own wheat; how they had built terminal elevators; how they had met competition from Argentine wheat, and other angles of the various problems met.

In concluding his address, Mr. Plumer said that the wheat pool, he thought, was long as the pool deserved support.

Water Supply Fails When Pipe Bursts

Bassano Without Water All Day Saturday

Bassano's water supply was cut off about ten o'clock Saturday morning last week, Sept. 21, when the ten inch water main burst near the British American Oil company's station on the west side of town. The taps were dry for the rest of the day until late that night when the break was repaired and the water turned on again. There was an acute shortage of water all over town, but the public works department brought relief by distributing water with wagon tanks. The pipe burst at a joint, and it is believed the break was caused by excessive pressure while pumping directly into the water main. The standpipe was not in use at the time; the big tank having been drained so the interior could be painted.

Hussar News

HUSSAR, Sept. 25.—There was quite a crowd from Bassano attending the starting club dance on Friday evening. Among them were Mrs. J. W. Hulmer, Mrs. J. King, Miss Violet King, Mrs. Hartley, Miss Patrick, Dr. G. Haworth, J. Fraser, J. Wright, Mr. and Mrs. H. Currie, Dr. and Mrs. W. P. Keith, W. J. Blankstein.

J. Wagner was so unfortunate as to have his right hand caught in the revolving machine while the first of the week. He had his hand attended to in Bassano, and had several stitches taken in the back of it. He was in Bassano and had the last stitch removed on Saturday.

Mr. and Mrs. Tom Lawson motored to Gem on Saturday to visit over the weekend with friends there.

D. K. McEachern went to Calgary on a business trip Monday.

Mr. Reiffenstein, from Chancellor, attended the dance on Friday evening.

Ben Gray was over from Gem for the dance on Friday evening.

Mr. McFarlane and son Jackie went to Calgary on Thursday and then on to their home in Winnipeg.

Mrs. J. B. Hurst returned from a visit to Okotoks on Friday.

Mr. and Mrs. C. T. Armstrong returned from a motor trip to Calgary on Thursday between the Glendon and Standard turns. Mr. Armstrong found a doctor's grip which he brought to Calgary, and later it was delivered to its owner, who was found to be Dr. Fletcher, of Standard.

Dr. Snyder motored to Lethbridge for the week-end to visit with his father, J. P. Snyder, who is ill in the Lethbridge Hospital. Mr. Snyder Sr. has his hand about three weeks ago, and blood poisoning set in, so that the first finger of his left hand had to be amputated.

Miss McIntyre, from Langdon, is visiting Mrs. Evelyn Clifford over the week-end.

The Misses Evelyn Clifford, Annie Robinson, and Frances Turner, and Mrs. A. C. Clifford, returned to Bassano Saturday.

About 80 Per Cent Of Bassano Wheat Crop Now Delivered

Grain Grades Mostly No. 2, With Some No. 1 and a Little No. 3

Combining and stock threshing is completed in the immediate vicinity of Bassano, and in the neighboring districts the work is practically finished. About 80 per cent of the Bassano wheat crop has been delivered to the elevators, much of it being hauled direct from the combine and threshing machine.

Most of the wheat handled by the local elevators graded No. 2 Northern, with some No. 1 and a little No. 3. There was more No. 1 than No. 2 grade. The grain has a good appearance, and weighs from 58 to 62 pounds to the bushel.

It is estimated that about 30,000 bushels of wheat will pass through the Bassano elevators this crop season.

Gem School Fair Being Held Today

Good Attendance In spite of Damp Weather to the Morning

A good sized crowd of children and parents turned out to attend the school fair being held in Gem today, Thursday, Sept. 24th.

The morning featured damp and foggy after the light rainfall Wednesday night, and the outlook for a good day was not very bright, but in spite of the weather large numbers of people began to arrive early, bringing their children with their exhibitors for the fair. In the afternoon the sky cleared, and the show shone brightly, making conditions more favorable for holding the children's sports.

The school fair dance will be held in the school house on Friday night, Sept. 25th. The Bassano Orchestra has been engaged to play the music.

Protest Sent To Post Office Dept.

Change in Mail Service Meets With Opposition from Bassano Citizens

Following the announcement of the change in the west bound mail service at Bassano, officers of the Board of trade took action early this week and sent a letter of protest to J. B. Corley, Calgary, district superintendent of postal service.

Under the new postal schedule, which will come into effect Sunday, Sept. 29, at the same time as the change in the C. P. R. train schedule, there will be only one mail service a day going west. The only train to carry west bound mail will be No. 1, leaving Bassano at 4:30 p.m.

In the letter it was pointed out to Mr. Corley that this service was inadequate, and that we required the service on the early morning train in addition, as they were the greatest loss to the citizen.

A strong feeling is prevalent against this radical change in postal service, and citizens hope to prevail upon the post office department to reconsider the matter before it comes into effect on Sept. 29.

New Bakery Owner Takes Over Business

Pleased With Town and Prospects For Business Expansion

J. Storance, of Leduc, who last week purchased the Bassano Bakery from Mrs. M. Lee, took charge of the business on Monday morning of this week. Mr. Storance has been busy all week filling orders for bread, and his product has found favor among the householders of the town and district.

In addition to baking bread, the new bakery proprietor makes cakes, cookies, doughnuts, etc., and several varieties of fancy bread. Mr. Storance has expressed himself as being pleased with Bassano, and hopes to build up a bigger business here.

His recent tour of the Dominion, he was accompanied on his tour by his son, Randolph, his nephew, John, and his daughter, Major Churchill.

His recent tour of the Dominion, he was accompanied on his tour by his son, Randolph, his nephew, John, and his daughter, Major Churchill.

HUSSAR CURLERS RAISE MONEY FOR RINK BUILDING

Carling Club Dance Well Attended

News of School Fair and Ladies' Aid

HUSSAR, Sept. 25.—The dance held on Friday night was a splendid success. People gathered from Gem, Mapleton, Bassano, and Chancellor, as well as in great numbers from this vicinity, and helped to make it a very enjoyable affair. The chicken supper was a decided drawing card.

At last reports the chicken had cost about \$15.00, and there were more tickets to be reported upon. The rink grounds have been levelled off, and the hole has been dug for the rink. The work is going forward in good shape on the skating rink ground.

School Fair on Friday On Friday, Sept. 27, the Hussar school fair will be held. Unfortunately this is the same date as that of the Brooks school fair, so Inspector Boyce will not be here as judge this year. It is expected that some one will be sent down from the Calgary Normal School as judge of the school work.

Ladies' Aid Meeting The regular meeting of the Ladies' Aid was held at the home of Mrs. J. Houghton on Thursday, Sept. 19. The meeting was well attended, eleven members and fourteen visitors being present.

The program consisted of a paper read by Mrs. Elliott on the topic "Let Prohibition Begin at Home," by Henry Ford, and a paper by Mrs. Clifford, "The Character of Fair Women," by Bruce Harrison. Many business matters were discussed and decisions made re renting of the Aid kitchen. It was decided to ask for a "plate shower" for the Aid kitchen, as the paper plates are proving unsatisfactory. Plates of all sizes will be seen with thanks.

When the committee on school sports equipment reported it was found that the two swings were lowered and repaired, and that two ladders had been installed in the school yard.

As Mrs. Betty had gone from our midst, Mrs. Montgomery was appointed in her place for the next year's committee, and Mrs. Hurlburt, the cook book printing committee.

Mrs. Brown read the financial report for the past three months, showing a balance of \$115.00 in the bank. The members expressed themselves as pleased to have so much at this season of the year.

Saturday, October 5th, was set as the afternoon of entertainment, and invitations have gone forward to the Aid and Women's Institutes, of Standard and Chancellor, that they may join with the Hussar Aid, and W. I. on this occasion.

Several letters of thanks were read showing the appreciation felt by those receiving loans in time of illness.

An enjoyable social hour was spent while the hostess served, a

Countess News

COUNTRESS, Sept. 25.—Royal Burrows has been on the sick list.

Mr. and Mrs. L. C. Goss, of Bassano, were present at the Cowen home Sunday.

Mrs. P. Horenson has been laid up with a badly sprained ankle.

Mr. Graham was a dinner guest at the Gamble home Saturday.

Mrs. M. Gamble and children and Mrs. Goss were callers at the Held home Sunday evening.

Mr. Graham left Sunday for his home at Hamilton, Ontario, where he will attend college this winter.

A. M. Anderson was in Bassano on business Wednesday.

The threshing machines are humming in this district. There are still a number of fields of grain to be threshed.

Kenneth Ferguson has been quite ill, and under the doctor's care for several days.

Mr. and Mrs. Hays returned to Beynon Monday for two weeks after a short visit here with relatives.

Sunday school will be held at the home of Mrs. A. M. Anderson on Sunday, September 29.

The pupils of Countess school left early Thursday morning for Gem to attend the school fair there.

Countess News DUCHESS, Sept. 25.—Miss Margaret Woodward, of Calgary, spent the week-end at her home here.

Miss Anna Hole left on Tuesday for Edmonton to resume her studies at the university.

Mr. and Mrs. Martin Ross, are rejoicing over the birth of a baby girl, born at Medicine Hat on Sept. 25th. The Rev. Mr. Turner, of Nelson, B. C., has been appointed pastor for the United Church, and will occupy the pulpit next Sunday morning. In duection services will be held in the United Church of Brooks tonight.

Several from here plan to attend. Mr. Wade Dowling is reported ill. There is quite a lot of illness among the children, but they are now improving. It seems to be the flu.

Mrs. C. B. Pierce was in Brooks on Friday, bringing her grandchildren, Edward and Paye Scheumann, back to spend the week-end.

D. P. Halley and R. L. McDonald will go to Calgary next Tuesday and return by airplane to the Ferguson sale at nine o'clock Wednesday morning where they will clerk the big sale of N. D. Ferguson. Mr. Ferguson will leave shortly for Calgary where he and his family will reside in the future.

Miss Mabel Miller, who has been ill for many months, is very low at this writing. Dr. Gershaw, of Medicine Hat, and Dr. Anderson, of Brooks, were in attendance Monday night.

Fire Destroys Shed Near Town Hall The fire bell disturbed the peaceful slumbers of Bassano citizens about 5:30 o'clock last Monday morning when fire broke out in an old shed just across the street from the town hall. The shed was burned to the ground. The only thing of value in the shed was a baby carriage belonging to Mr. and Mrs. A. Meucci, and this was lost.

The fire had a good start before it was discovered, and burned the dry straw and weeds surrounding the building, threatening to spread to the house occupied by A. Meucci, and across the lane to Dr. Scott's property. Fortunately no one was injured. A crowd of volunteer fire fighters arrived in a short time, and the flames were prevented from spreading and doing further damage.

more appalling lunch. The next meeting will be held at the home of Mrs. Thos. Larsen, on October 17th.

Charity on Saturday Saturday, October 5th, was set as the afternoon of entertainment, and invitations have gone forward to the Aid and Women's Institutes, of Standard and Chancellor, that they may join with the Hussar Aid, and W. I. on this occasion.

NEW PASSENGER TRAIN SCHEDULE STARTS SEPT. 29

Bassano to Have Only One Passenger Train a Day Going West

The new passenger train schedule on the Canadian Pacific Railway Co. main line, which takes effect Sunday, September 29, is a decided change to be made in the west bound trains, but the east bound trains will run about the same as before.

The trains on the new schedule will run as follows:

No. 1, west bound, will leave Bassano at 4:30 o'clock in the afternoon, going by way of Hinton.

No. 2, west bound, is due in Bassano at 5:05 a.m. This train will stop in Bassano for coal and water, but will not take passengers, mail, or express. It will detain passengers from Moose Jaw and points east.

No. 2, east bound, is due at 4:30 a.m., and will not take passengers, mail, or express.

No. 4, east bound, is due at 5:15 p.m., with the usual passenger, mail, and express service.

No change is announced in the train service on the Empress branch and the Irricana branch. No. 516, bound for Regina, leaves Hinton on Wednesday, Wednesday, and Saturday, and is due here at 10:35 a.m., and leaves at 10:50 p.m.

The Drumheller Mixed The Drumheller mixed is the new train running on the Rosemary northerly branch. This train goes to Drumheller every Monday, Wednesday, and Saturday, and is due here at 5:00 a.m. It makes the return trip every Tuesday, Thursday and Saturday, arriving here about 2:30 in the afternoon, and is due at 5:00 a.m. Yields are very good in most cases, considering the dry season.

Mrs. S. Lawrie returned home from a visit to Calgary, where she has been spending a few days in Calgary. Mrs. Small and children are enjoying a short holiday in Banff.

Little Joe Hoyer, son of Mr. and Mrs. John Hoyer, who was receiving treatment in the Bassano Hospital, is now quite recovered, and was brought home on Thursday last.

Mr. G. Villet, of B. C., is visiting in the Colony, and is the guest of Mrs. J. Hoyer.

Mr. Dickman and Miss Freda are expected to return to the Colony on Saturday next.

Mr. Villet, Sr., is at present a patient in the hospital of the Mayo Brothers at Rochester.

Big school fair dance in the Gem school on Friday night, September 27th. The Bassano Orchestra will play. Come and enjoy the ballroom dance and other novelties.

Bert Keeling is to become a patient at the Bassano Hospital during the next few days. He will be operated on for appendicitis.

Miss M. Douglas is expected home for the week-end. She is a student at the Garbutt Business College in Calgary.

Death of Mrs. Dickman The deep sympathy is felt for Mr. G. Dickman and family in the great loss they have sustained in the sad and untimely death of Mrs. Dickman, the sad event taking place on September 17, in a Chicago hospital. The late Mrs. Dickman had been for three months ago for Rochester to receive treatment for cancer from the famous Mayo Brothers. Later she went to Chicago to visit relatives. There she became ill and gradually sank till the end came on September 17. Although only in the district a couple of years, the late Mrs. Dickman made many friends here. She will be a big loss to the community, as she was always a willing worker, and her many friends will miss her pleasant smile and genial manner in all the social activities.

Card of Thanks On behalf of Mr. G. Dickman and family, Mr. and Mrs. E. G. P. Fortuna of Calgary, and the members of the Gem community, and also the members of Gem local U. F. A. Broodery racketeers, for the beautiful flowers, and also the kind expressions of sympathy sent them during their bereavement in the sad death of the late Mrs. G. Dickman.

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were the nations thus mutually suspicious, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind and nearly destroyed civilization. The statement of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more dreadful struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions allayed, and a true understanding developed among all peoples of other countries, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism rampant everywhere.

The League therefore set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard of life, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world's peace is to be found in the realm of economics, in the rivalry of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has brought more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Briand's proposal for a United States of Europe is economic, rather than political. We venture to say, it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over the world, and to unite one nation from another, and doing economic harm to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States are coming to realize in much more understanding and goodwill, are more frequently discussing tariff than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely it is a dream that must be removed, and the world begin to trace the path that leads to the ultimately desired goal.

Diamonds From Sugar

Scintillated Produce Sparkler That Made In Laboratory

Predictions that "large and beautiful real diamonds can be made by man, was made to the American Chemical Society, at Minneapolis, by Professor J. William Hersey, of McPherson College, McPherson, Kansas.

He laid on a glass slide a tiny crystal, the size of a grain of sand. He said it was a real diamond, produced in his laboratory at McPherson. It was made from ordinary pure table sugar subjected to pressure estimated at ten tons to the square inch.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

Greatest Wheat Exporters

Canada Stands At Top Of The List

As An Exporter Of Wheat, Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 250,042,278 bushels. The United States came second with exports of 168,307,000; Argentina, third, with 155,288,000; and Australia fourth, with 109,960,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,805,000 bushels ranking third with Russia in the first place and the United States in the second.

RHEUMATIC PEOPLE

CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but it is the blood. The cause is in the blood. Hot applications or rubbing will not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills. These pills make rich blood, thus removing the rheumatic poisons from the system. Mr. Henry E. Amis, Lower Canada, writes: "I had a severe attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would have given up. I took the last week, and any movement caused great pain. The doctor the care of a doctor but did not improve much. Then reading of Dr. Williams' Pink Pills, I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes there was no doubt they were helping me. I was able to walk a few miles to my work, and after a few days, and then walk home again. I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Williams Medicine Co., Brockville, Ont.

A Peace Disturber

Automobiles Who Toot Their Horns

A Toronto justice has been fined \$500 for disturbing the peace by tooting his horn to notify the city that he had arrived in front of the apartment house and was waiting to take on cargo. Most persons will be glad to hear this. Horn tooting is a nuisance in every urban community. One way to get rid of them would be by the authorities declaring an open season on them and permitting the neighbors to take pot shots at them when their presence is detected by their blaring, but a less exciting way would be to have them outlawed by bylaw.

When Asthma Comes do not despair. Turn at once to the effective Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need to soothe, choke, cough, breathe, become natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and every day.

Postal Revenue

Now On A Level With What It Was Three Years Ago When Letter Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago, despite the return to the two cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31, 1928, the revenue was \$31,025,000, and for the fiscal year ended March 31, \$31,170,000.

Winnipeg Industries

Recent new industries established in Greater Winnipeg include: Fox and Co., confectionery, box and silk painting; corrugated boxes, and toilet preparations.

Worms in children, if they be not attended to, cause convulsions, anorexia, and other ailments. A good wormer will protect the children from these distressing ailments.

Best When Left Alone

No Need For Discussion About Anglo-American Relations

There is no real necessity for Great Britain and the United States to discuss their navies at all. Every sailor and every citizen of the world, and efficiency of the British Fleet. Every sea lion regards this addition to the American Navy as an extra reinforcement of the world's peace. Where there is no ground for quarrel there can be no question of hostile competition.

Sheep Ranching Expanding

Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, where the Department of Agriculture, last fall upwards of 10,000 head of ewes were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

It Has Many Qualities

The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, a cold, prevent sore throat; it will relieve the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Horse Provided A Thrill

Children In Venice Saw One Recently For The First Time

All Venice through the Ponte di Rialto to look at a horse. It was quite an ordinary horse, but the first seen in Venice for many, many years.

The much-admired bull belonged to M. van Broussel, a young Dutchman, who has just arrived from Venetian children were radiant, for, except horses in statues, this was the first that most of them had seen.

To fit up an hotel with running water, hot and cold, in every bedroom means an average layout of about \$125 a room.

A census is to be taken in more than 200 countries and colonies next year.

People in the United States use up more than a million lead pencils each year.

Daring Stunt Flyers

"Four Musketeers Of the Air" Dedy Dead At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who, by rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best at its own particular part. The Musketeers are: Squadron Leader C. McEwen, M.C., Flight Lieutenant David A. Harding, famous rugby player, Pilot Officer R. McEwen and Pilot Officer J. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Blenheim pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics at Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a peculiarly obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite "trick" is a very spectacular one. The planes, starting in formation at around 3,000 feet, "suddenly" nose down. At terrific speed, with no time to open eyes, they head out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Had Ben There

"Travelled" said a sailor in a train to a passenger who had questioned him. "I should think I have. I've been all round the world, over and over it too. There ain't many ports I don't know the inside of."

"Why, you must know a lot about geography."

"Yes, we did put in there once, but only to catch the ship." That's much of a place, what I remember.

Reinforce in Alaska are proving

A Real Necessity

"Don't Get Excited" Club Would Be a Boon To World

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely unprovided. What we need is a don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and too excited over big things.

Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more can be accomplished through poise and placidity than through effervescence and scientific phenomena.

If it didn't get-excited club could be so organized as to conserve all the human vitality that does not go to waste through needless excitement it would mean that mankind had reached the suburbs of a new era.

Increased In Water Power

The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 200,000 h.p. added to the Dominion's total within the half year.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is a protection carried out to the limit.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, accompanied by a group of directors of the company, is now on his annual tour of inspection of company's properties and conditions in the west. Resorts, agricultural centres, farms, mines and smelting plants, as well as the system itself was inspected during the tour which started September 1 from Montreal and closed at Winnipeg October 2.

"I am watching with the greatest interest the progress being achieved in the United States where railways are experimenting in the use of aeroplane as adjuncts to their railway services," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, interviewed at Toronto recently. "There they are using planes by day and night and the experiments are very interesting to me," the president added.

WE DON'T LIKE IT

Starting Sunday, September 29 the Canadian Pacific Railway Company will adopt a new schedule for their passenger trains on the main line—a schedule, that will materially affect the people of the Bassano district. And with the change in train service there will also be a radical change in the mail service.

Both the change in the passenger service and in the mail service are a backward step, and will cause much delay and inconvenience to the people of Bassano and neighboring districts. The passenger trains running between Montreal and Vancouver are being speeded up, and on the new schedule the No. 3 west-bound train will arrive in Bassano at 5:05 a.m. instead of 1:05 noon as at present. No. 2 will stop for coal and water and to detain passengers from Moose Jaw and points east. It will not take on passengers or mail at Bassano. This means that Bassano will have the service of only one train a day going west, that train being No. 1, which will leave here at 4:35 p.m.

This is a great inconvenience for both passenger and mail traffic, and local citizens strongly object to the change. It is a backward step, and for an important railway junction point like Bassano it is bound to cause delay in passenger travel and congestion of mail. As far as the mail service is concerned, it will work out in this manner: A letter posted on Monday in Bassano after 4:00 o'clock p.m. will be held here for the No. 3 train on Tuesday. It will reach Calgary by 10:30 o'clock Tuesday evening, and will not be delivered until Wednesday morning. The mail from Standard, Chancellor, Hunsar, and Maple are will be similarly affected. This mail, reaching here Monday at 5:00 p.m., will be held here almost twenty-four hours before going to Calgary Tuesday afternoon, and will not be delivered until Wednesday morning.

The change in the passenger service is going to cause much inconvenience for many passengers who travel to Calgary on the early morning train. This train stops at Bassano anyway to take on coal and water. It would require but a few minutes longer to lift the mail and take on passengers. The slight gain in time by not doing so is greatly outweighed by the delay and inconvenience to mail and passenger traffic.

WHEAT CONSCRIPTION

H. W. Wood, president of the Alberta Wheat Pool, says that a compulsory wheat pool is unobtainable. This statement was made when Mr. Wood was interviewed regarding a compulsory pool in Alberta similar to that being advocated for Saskatchewan by Aaron Sapir.

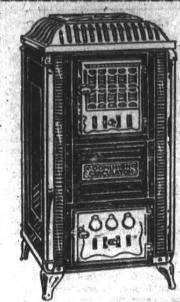

Mr. Sapir's plan is that when two thirds of the wheat growers of Saskatchewan voluntarily become members of the pool, the remaining one third be compelled by government legislation to market their grain through that organization.

The scheme is most undemocratic and not to be tolerated by a people who are accustomed to think and act for themselves. The strength of the wheat pool lies in the faith and the whole-hearted support of its members. If farmers become pool members by force instead of by choice, the organization is destroying the co-operative idea, the very thing that brought the pool into existence and enables it to carry on.

SAFETY FIRST

A safety first campaign to reduce the dangers of motoring is now being conducted by a number of business firms in Calgary. The campaign got under way last Saturday with a full page advertisement in the Calgary Herald. The first advertisement pictures, in a graphic manner, the danger of railway crossings.

Circulating Heaters

These heaters take the cold air from floor and passes it out superheated. The far corners of the room are as warm as close to the heater. Does the work of a furnace. Easy on fuel.

May be had in plain finish, walnut enamel, or blue enamel finish.

FLANAGAN BROS. HARDWARE

Telephone 118 BASSANO

seconds at a railroad crossing. A few seconds can be easily, and more safely, gained on an open stretch of the road beyond. Give a railroad crossing the same consideration that you would an arterial or through street—then proceed cautiously in low gear until you have cleared the tracks."

The campaign is a most worthy one, and it is to be hoped that the motoring public will heed the advice to exercise greater care.

THE BUS-CONDUCTOR

(by Robert Bell)
 Are you a brother and a man.
 Or just a cog in the machine—
 That engine on the chest-board plan
 In which a hand, unknown, unseen,
 Moves us from place to place, and
 . . . then,
 A little later, moves back again?

You do not know me, though you
 . . . take
 My daily copper as I sit
 Behind the driver, broad, opaque,
 Who is himself another bit
 Of that same mechanism which
 Drives us to Millenium—or the ditch.
 Year in, year out, we never fail,
 You with your punch and scotch, I
 With office bag and Daily Mail;
 And we mingle with mirth and
 sigh?
 Oh, no, the nearest that we get
 Is to remark the morning's paper
 . . . wet.

You carry, besides coppers, cars;
 And I for my part go in fear
 My steed will stumble unawares,
 With that black figure in the rear;
 But what of these, my friend and
 brother—
 For we are fleecing to one another.
 One day I'll not be there, and you
 Will have one passenger the less;
 Or I shall find a face that's new
 Upon the step, and dilly guess
 Whether in turn you've paid your
 fare
 On that last bus with always room
 to spare.

As coins grow dull with constant use,
 Forget their first similitude,
 So men, packed by the millions, lose
 The primal bond of brotherhood,
 And, scurrying underground like
 moles,
 Sharpen their wits and stultify their
 souls.

Eliminating the State
 Doctor: "Your mind must be absolutely quiet. Here is a sleeping draught."
 Wife: "When do I give it to him?"
 Doctor: "You don't; you take it yourself."

Veteran Under Fire
 "Did you give the man a third degree?" asked the police officer.
 "Yes. We browbeat and badgered him with every question we could

think of."
 "What did he do?"
 "He dozed off and merely said 'Yes, my dear, you are perfectly right.'"

Drive It...

and let your own experience sell you

No one who has sat behind the wheel of the New Chevrolet Six could ever be contented with less than the quality . . . less than the performance that this outstanding SIX provides.

For Chevrolet is the lowest priced car in the world with this remarkable combination of fine car features—

Body by Fisher, with deep, richly-upholstered cushions, Fisher VV Windshield, Tennessee Springs, fashionable Duco coloring, smartly beautiful design. Six-cylinder valve-in-head engine, of high-compression non-detuning type, with the extra efficiency of "direct firing" and softer pick-up due to automatic accelerating pump.

New design, half-bearing steering gear, giving marvellous handling ease.

Efficient braking system of non-locking four-wheel brakes and independent emergency brakes.

Long non-slip, shock-absorber springs, parallel with the frame.

Modern Convenience Features, twin-beam headlights, foot-controlled, high-speed window regulators, indirectly-lighted instrument panel, including electric temperature gauge and dash-proof Electrodes.

And all these, plus the established economy and staunch endurance for which Chevrolet is famous, at the price of a four! Drive it, and let your own experience tell you on Chevrolet SIX.

IT'S BETTER BECAUSE IT'S CANADIAN

Sixty-three wells are being drilled in the Turner Valley, 20 miles south-west of Calgary. 21 are just about to be started and 20 are producing crude naphtha or crude oil—a total of 112 wells. Mr. Winston Churchill, on his recent trip across the Dominion by Canadian Pacific paid a special visit to the Turner Valley accompanied by Mayor Osborne of Calgary.

Selection is announced of John W. Dufos, Editor of the Winnipeg Free Press, to act as a commissioner on the part of the United States on the International Commission under the Treaty for the Advancement of Peace between the United States and Germany. Dufos was selected for this post by the United States Government acting through Hon. William Phillips, the International Commission now being set up by the United States and Germany is to have five members, of which Mr. Dufos is the first to be named. All disputes between the United States and Germany, after ordinary diplomatic proceedings have failed, are to be referred to the Commission.

Such Friends

After a few misplays Mrs. Blank felt called upon to apologize.

"Dear me," she said, "I'm getting so blind I can hardly see my face in the mirror."

"Lucky for you," murmured her offended partner.

"Yes," she replied, "Sorry you're not so lucky."

Tumorous Redundance

Wife: "Deceiver, I hate you!"

Husband: "But yesterday you said you loved every hair on my head."

Wife: "But not every hair on your shoulder."

Silver Lining

"Prits? 'Dad, you are a lucky man!"

Father: "How is that?"

Prits: "You won't have to buy me any school books this year. I have been left in the same class."

HEALTH SERVICE

of the
CANADIAN MEDICAL ASSN
FOOD PADS

The individual who desires to live a healthy life and to eat as he should finds it difficult to decide as to his proper food because of the number of fads which are shouted from the housetops and advertised in striking and convincing ways. It is not possible even to mention all the foods in a brief space, but an attempt to discuss them. Merely a few of the outstanding fallacies of the claims will be mentioned in order to guide the reader in considering this important subject.

That one individual apparently prospers on an unusual diet is no reason for believing that such a diet is generally suitable; any more than it is reasonable to say that all men should be marathon runners because one man does well on that type of exercise. There is no evidence to show that vegetarians enjoy better health, or that they live longer than those who use meat. It has been pointed out that two of the most remarkable recent medical discoveries—liver extract as a treatment for pernicious anaemia and insulin for the treatment of diabetes—are two extracts of meat which are life-savers.

There is no scientific evidence which supports the idea that cancer has anything to do with the use of refined foods, such as white bread, or the eating of meat. There is no foundation for the idea that the dangerous food combination, which is based upon the idea that certain foods should not be eaten together, as one interferes with the digestion of the other. There is no need to eat one particular food in order to acquire some constituent such as iron or calcium. There is no objection to these foods, but it is a variety of foods, including milk, green leafy vegetables and fruits, which ensure a sufficient quantity of minerals and vitamins for the adult.

The foundation of health is moderation. Do not eat too much. Eat slowly. Eat regularly. Use milk and milk products, green leafy vegetables, and fruits regularly. Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Here and There

Canadian Pacific steamer Minnowna recently brought over to Canada two fine stations belonging to the Prince of Wales, "Aide-bay" an Arab, and "Crusader," a Clyde, to go the royal ranch at High River, Alberta. The two horses broke their journey at the Toronto Exhibition, and later were carried across the Dominion by Canadian Pacific Express. Special accommodations was provided for them on the Minnowna.

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the Baldwin administration, visited his wife recently when he climbed his way through the Rockies, to accomplish which he had travelled some six thousand miles by Canadian Pacific Express of Australia and lines to Lake Umbagog from England. He found his way through alpine peaks and many other hardships to the top of the peak. He was accompanied by a Swiss guide, Edward Feuz, of Lake Louise.

"Mr. Churchill loved very funny working on one of father's threshing machines," said Mr. George Rodney, aged ten, who is his younger brother John recently travelled to England to take up schooling. Winston Churchill is a cousin of Lord Rodney who owns a ranch at Fort Saskatchewan, Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Beauséjour, consisting of 41 square miles located in Carleton and York counties. This makes a total in all of about 640 square miles of territory set aside in the province as game sanctuaries since 1919.

Hon. J. L. Perron, Quebec minister of agriculture, has announced the loss of two-thirds of the purchase price of pure-bred sheep without interest charges, to Quebec farmers. He aims to place 25,000 pure-bred sheep throughout the province to bring in a yearly revenue of \$250,000.

A yield of 3,295,995 barrels of apples is expected in Canada this year, as compared with 3,235,970 in 1932. Compared with the five-year average of 3,863,310 barrels this is an increase of 20%, making it a bumper crop.

Homestead entries in the four western provinces continue to run well ahead of last year. For the half year they number 7,129 as compared with 5,167 in the same six months period of 1932. Alberta topped the list with 4,652 filings; Saskatchewan followed with 1,281; British Columbia recorded 371 and Manitoba, 225.

Coming Down to Brass Tacks
It's sweet of you to tell me
That I am all in all,
That I'm the apple
Of your eye,
That I'm the rainbow
In your sky,
That I'm a mode
Upon your pie,
That I'm the works,
That I'm the sky,
For whom you'd pass,
The others by,
That I'm your who,
Your whence and why,
For whom you'd cry,
For whom you'd sweat,
For whom you'd lie,
For whom you'd die,
The sweet of you to tell me
That I am all in all,
But whose are those large over-
shoes
I passed out in the hall?

Punishing the Guilty

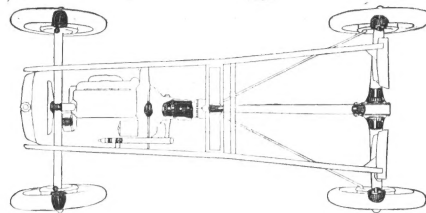

There was a pawlik humor—or was it really wit?—in the remark of a boy, coming home one Sunday afternoon with a string of trout, was suddenly confronted by the minister. There was no way of escape, but the boy rose to the occasion.

"Minister," he exclaimed, "I've seen what those roots go for 'nabbin' worms on a Sunday?"

24 BALL and ROLLER Bearings

**Reduces Friction
and Makes for
Ease of Operation**

Ford Car Features

- Choice of colors
- 21 to 25 miles an hour
- 40-horse power engine
- Full ballion tires
- Fully enclosed six-brake system
- 80 to 100 miles per gallon
- 4 Handicaps shock absorbers
- Shatterproof glass windshield
- Thrift proof ignition lock
- Reliability and low upkeep

LAVISH use of ball and roller bearings in the Ford car greatly reduces friction and contribute to easier operation and longer life of the car. Note the coasting ability of the Ford car as compared to any other automobile in its weight class.

Examination of the chassis will at once show the advantages of these bearings. On the rear axle pinion and differential all the taper roller bearings are held to such close limits that adjustment is unnecessary, pinion and ring gear always being held in proper mesh.

Spiral roller bearings are used in the rear hub because of their large bearing surface and ability to carry heavy loads. One is also used on the drive shaft at the universal joint end, to assure perfect alignment.

Taper roller bearings in the front wheels have a simple adjustment. Roller thrust bearings on the spindle bolts make for easy steering. Two bearings, one above and one below, take up the thrust on the steering worm.

The fan shaft operates on a roller bearing. The generator, the transmission, the connection between the spline and drive shafts, the clutch, the flywheel—all these important parts are made more efficient and enduring through the use of ball and roller bearings.

These bearings form a striking illustration of the engineering skill and care used in building the Ford car.

Arrange for your demonstration ride with the
nearest Ford Dealer

BASSANO :: CLUNY :: GLEICHEN

Local News

Mr. and Mrs. R. P. Maurer were visitors to Calgary early this week.

Bill Pollock, of Gen. was in town on business last Wednesday.

Mrs. J. H. Stiles is visiting in Calgary this week.

Tommy Sutherland was a business visitor in Bassano last Wednesday.

Miss Lillian Hayes, of Calgary, is visiting in Bassano this week, with her sister, Miss Gladys Hayes.

Inspector J. P. Boyce went to Gen Thursday morning to attend the school fair.

The curlers ball and chicken supper in Hussar last Friday was attended by a number of Bassano people.

The new passenger train service comes into effect next Sunday, Sept. 24th.

Mr. and Mrs. Chas. Tufts left last Sunday night for their new home in the Peace River district.

A baby girl was born in the Bassano Hospital on Thursday, Sept. 26 to Mr. and Mrs. L. J. Fraser, of Detroit, Michigan.

An organization meeting of the Knox Church choir will be held on Sunday evening, September 29, at the conclusion of the regular service.

Gen school fair dance on Friday evening of this week, Sept. 27, in Gen school. The Bassano Orchestra will play the music.

Ward Simpson played for the dance at Queenstown last Friday evening. Several Bassano people went over to dance.

Mrs. H. Cutforth will hold an auction sale at her home, two miles north of Bassano, on Wednesday, October 2.

Mrs. J. C. Porritt, of Drumheller, is visiting in Bassano with her daughter, Mrs. Wm. Noble. Mrs. Biggs, also of Drumheller, sister of Mrs. Noble, is also visiting here.

Mr. and Mrs. E. A. Beck, who are now in Montreal, are expected home next week. Mr. Beck has been attending a convention of Sun Life of Canada in the big eastern city.

Mrs. G. N. Wilson is back in town after spending the past couple of months in Calgary with her son Irving Wilson.

The Anglican vestry will hold a whist drive and dance in the Masonic Community Hall on Friday, Oct. 4th.

Mrs. M. D. McDonald returned home early this week after spending the summer visiting relatives in the eastern states.

A light rainfall Wednesday night brought another delay to threshing operations.

The Gleichen town council has drawn up a by-law for erecting a covered skating rink at a cost of about \$12,500.

Farmers in the Makepeace district are seeking to get a rural free delivery route established there. This week an official of the post office department was in the district looking into the matter.

INTROSPECTION

There is no prayer upon my lips
Nor is there any in my heart—
I cannot touch my finger tips
And kneeling bid all pain depart.
Nor ask of God what I would gain—
Nay! all my strength must be within
In that strange place where soul
Meets brain.

If this be evil I must sin.
And yet—'tis strange—if I could
Pray,
What would I ask? I do not know.
There is not aught for which I'd say,
"Ah, God in heaven, I want it so."
Unless, perhaps, it could be this—
To find a dream, to see a star,
And know the strange unequalled
bliss.

Of reaching out—for things too far.
Rev. O. H. Miller, the Albany reformer, was talking about modern youth.

"Modern youth may be vicious—I know nothing about that," he said, "but I do know that it's terribly self-righteous."

"A young idler called on a millionaire and told him melancholy that he wanted to marry his daughter."

"The millionaire got ready to read the young fellow a lecture on idleness, and began:

"Young man, do you know how I made my money?"
"Yes, Oh, yes," said the young man, "but I can't let that stand in the way of Lottie's happiness."

Heartless Fakers

The following article was published by the Jackson Tribune, Jackson, Michigan, and appeared in the Calgary Alberta a couple of weeks ago.

Of all the fraudulent, false made upon the purse of the credulous, none are so heinous as those charlatans who offer cures for incurable diseases, or worthless remedies for ailments which might be successfully treated by competent practitioners.

Probably the most conspicuous of this class of vultures is that which offers to "fit" glasses by mail—a dishonest proposition, on its face, offering as it does, to do a thing which cannot in the nature of things be done.

To measure the amount of error in the refraction of the human eye requires the services of one skilled in such work, and this service cannot be rendered by mail, telephone, or in any way save by the personal examination of the patient by one skilled in the profession.

Not only do these fraudulent advertisers fail to deliver eye remedies, their victims almost without exception suffer actual injury, for the spectacles so sold are but a fair grade of magnifying glasses, which makes print look larger; and, if so convinced that a benefit has been received, consultation with a competent optometrist may be deferred until real relief becomes a difficult and costly matter.

Grinding a pair of lenses to meet the needs of a pair of eyes, neither of which is ever exactly like the other, is an intricate and starting process; and the advertiser who offers to perform this feat without even examining the eyes to be fitted, and at a price often less than the actual labor cost of the work, is so manifestly a swindler that it is strange indeed that reputable advertising mediums accept their business.

That a government-owned post office department permit them to use the mails; and stranger of all, that ordinarily intelligent men and women answer the advertising and patronize the advertiser.

Unfortunately there appears to be no way of successfully prosecuting these spectacle quacks, because of the technicalities behind which they shield themselves; and so it becomes the duty of reputable newspapers to issue a warning to their readers that they may beware the deceiver which he behind the preposterous promises of the graffer who promises to fit glasses by mail.

And a Good Lad

Teacher: "Who was king of France during the revolution?"

Confused Student: "Louis the Thirteenth—no, the Fifteenth—no, the Fourteenth—no, the well, anyhow, he was in his teens."

No Reward

"Mummy, what ya' goin' to gimme on my birthday?"
"Nuffin, if ya' a good child."

Putting a Kick in Shakespeare
Teacher: "What did Juliet say when she met Romeo in the balcony?"
Pupil: " 'Couldn't you get seats in the orchestra' "

Second Night

Wilbur, having been to New York, was telling his cronies of the sights he saw.

"As' up at the hospital I seed one of these machines that tell if a man is lying."

"Pooh," said Luke from his corner. "Pooh? Did you ever see one?"
"See one? I married one."

NIGHT

(By Grace Ross Crowell)

Thank God for night—with its great gift of sleep—
More wonderful than all its gifts to men!

For stars that walk the dream-ways
And that keep
Their wide-eyed watch until dawn breaks again!

Thank God for blessed silence down the land,
For darkness—soft and cool as some dear hand
Laid on a forehead feverish with pain.

Oh, only those who carry sleepless scars
Can know how sweet sleep is that comes at last,
And only the eyes that have looked long at stars

Have learned night's secret as it marches past;
Have learned to know how quiet God must keep
To guide an earth through stars that men may sleep.

And a Good Lad

Teacher: "Who was king of France during the revolution?"

Confused Student: "Louis the Thirteenth—no, the Fifteenth—no, the Fourteenth—no, the well, anyhow, he was in his teens."

No Reward

"Mummy, what ya' goin' to gimme on my birthday?"
"Nuffin, if ya' a good child."

Putting a Kick in Shakespeare

Making A Choice

The shopper of today has a wonderful range of goods from which to choose, a purchase. Stores carry a great variety of styles, colors, fabrics, and materials—goods for every taste and for every purpose.

The well-informed shopper keeps posted on new and better materials, on trend of style, on new devices and new mechanical improvements. The shopper does this by reading the advertisements in the newspapers. Shopping is thus greatly simplified by a fund of information which assists the shopper in spending his money to the best advantage.

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada, it has been announced. Growing commerce between the two countries is given as the reason.

The monoplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Peaceful Arts in New York.

A young peach tree bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,154,266 bushels with a valuation of \$14,397,483, according to returns compiled by the Dominion Bureau of Statistics.

The R-100, British dirigible now under construction at Cardington, England, which was expected to make a trans-Atlantic flight to Montreal this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 78, after an illness extending over several weeks.

Lord Ypres, son of the late Field Marshal, plans to leave for the United States shortly to exhibit his paintings. Lord Ypres paints his pictures in a studio built in the garden of his home, Ypres House, built during the reign of William III.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

French Bakers Celebrate

Commemorated Four Hundredth Birthday of the Doughnut. This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous comestible was made in Paris in 1520. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent. The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hoe and moulded the doughnut round the vacant space.

Promoting Trade Welfare

Six Apprentice Grocers From Great Britain Now Touring Canada. So that they may know better the Canadian goods they will send over the counters in their shops in England, and to promote the welfare of trade between the mother country and the Dominion, six apprentice grocers from Great Britain are now touring Canada, under the auspices of the Department of Trade and Commerce, with the co-operation of the Canadian National Railways. They were selected for the tour by an award competition conducted by the British Institute of Certified Grocers for the Department of Trade and Commerce.

Clue To Unsolved Mystery

MacMillan Expedition Finds Trace Of Frobenius Party, Lost In 1578

A clue to an unsolved mystery of nearly 400 years standing—the fate of five men left on Kaduadian Island by Sir Martin Frobenius in 1578—is reported by Donald B. MacMillan, on his return here from over two months' exploration voyage to Baffin Land.

On an island on Countess Warwick Sound, the famous explorer discovered an ancient stone house in which the Eskimos said was the work of white men. Inside were the bones of a bear and other evidence that it had been used as a shelter. The age of the house and other particulars pointed to the dwelling being contemporary with Frobenius.

Kaduadian was also visited and there the party found, in a very fair state of preservation, the house built by Frobenius in Queen Elizabeth's day. Digging in the earth floor, they discovered some pottery and other relics belonging to that period; also traces of the shipwreck down which the intrepid explorers launched the boats they built after their ships were crushed by ice.

It was hitherto supposed that the five men left behind by Frobenius on the island of his voyages made attempts to build a fort to protect the supposed gold mines and had been killed by Eskimos. Careful enquiry among the natives reveals a tradition that the white men were not slain, but built a big boat and sailed on their perilous return to England.

The relics now found by MacMillan indicate that they had proceeded only about fifty miles when their small craft was crushed by ice, and one or more escaped ashore and built the shelter in Countess Warwick Sound.

THE GROWTH OF CANADA'S EXPORTS

Nowhere is the advance in the development of Canada's resources more vividly reflected than in the records of the Dominion's export trade. The sheer increase in the value of that trade is amazing enough in itself, but no less astonishing is the manner in which Canada's exports have spread out into new channels.

The United Kingdom and the United States have long been Canada's two great customers, and until recent years other countries have taken only a minor share in the Dominion's exports. Within the past fifteen years a remarkable change has occurred. During that period the Dominion's sales to the United Kingdom have doubled in value, those to the United States have trebled, and at the same time exports to "Other Countries" have risen more than seven-fold. These "Other Countries," formerly a minor factor, now afford

a huge market outlet for Canadian products. They bought from the Dominion last year a bill of goods greater in value than the whole export trade of Canada fifteen years ago.

To these widely scattered and lesser-known markets Canada's resources furnish a common variety of products in natural and manufactured forms. Silver and artificial silk to India, newspaper and sailcloth to Australia, potatoes to Cuba, lead and lumber to Japan, herring to China, furs and pelts to Sweden, oats and wheat to the Netherlands, salmon and furs to France, cereals and furniture to South Africa, rye to Norway, zinc and asbestos to Germany, codfish and copper wire to Brazil, aluminium and woodpulp to Italy, and of course wheat and flour to all quarters of the globe—these and a thousand and one other items help to extend the web of Canadian commerce across the seven seas.

Recipes For This Week
(By Betty Barclay)

CARROT MARMALADE

12 raw carrots
4 cups sugar
3 Sundat lemons
1 teaspoon ground cloves
1 teaspoon ground cinnamon
1 teaspoon ground allspice
Grate carrots, add sugar and lemon juice, and cook slowly for one hour. Turn into sterilized jars and seal when cold.

SEEDLESS BLACKBERRY JAM

The seeds of blackberries are very objectionable to many, so it is well to get rid of them. Mash berries, cook in their own juice until thoroughly heated then remove seeds by pressing through a fine sieve. Measure and add sugar and allow one cup sugar for each pint. Add sugar to pulp and cook rapidly until thick, stirring frequently. Pack in clean, hot jars and seal.

Research Possibilities

By Dr. H. M. Torsy, President of the National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that has before the chemists of this century in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$150,000,000. The production of chemicals in Canada reached \$500,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$1,000,000,000.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas, is to be undertaken on a very extensive scale within the next few weeks. It is reported.

Served In Riel Rebellion

Captain H. O. Gray, 74, for years a crack rifle shot on teams representing Canada, died in a hospital at Ottawa. He was a member of the Ottawa sharpshooters during the Riel Rebellion in 1885. He was a member of the council of the Dominion of Canada Rifle Association.

The man who feels a small job beneath him is invariably too small for a bigger one.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canby, N.B., writes: "My little boy, when three years old, had a severe attack of diarrhoea. He was very so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved. "I have used it for the other children, and my husband and myself. My husband gives it to his children, and when he gets away from home he will always take a bottle with him. Put up only by The N. Milburn Co., Toronto, Ont."

Lure Of The Northland

Ottawa Deluged With Inquiries Regarding Port Churchill

The lure of the North is strong in the hearts of the Canadians. Any one doubting this should see the correspondence pouring in on the Department of Railways and Canals asking to be allowed to go to Churchill. The flood of requests started when a news item announced that it might be possible to build a railway to the end of the month.

Every one seems to be wanting to go North. The requests come from Boards of Trade wishing to send parties up there from Legislatures wishing to send representatives of the government, big commercial interests desirous to be early on the scene and the great mass of individuals who want to grow up with the port. It is rather embarrassing to the department, because at present the only holdings at Churchill are those to house the men engaged on the dredging and the railway construction. The only food supplies, that are those belonging to the Government.

Hon. C. A. Dunning, Minister of Railways and Canals, Sunday, that his department was preparing a statement which will be published in the near future, and which will state that during the summer the construction gangs have continually been called upon to feed adventurous spirits who were their way by an otherwise to Churchill without making any provision as to what they should eat after they got there. The Manitoba Government will be the job of supervising the building of the town. The Federal Government will be in charge of the railway and the port improvements. It looks as if Churchill would be a Mecca for tourists from the start and the first call will be for a hotel.

Juveniles To Complete Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls in Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces. This is the first year in which the Canadian National Railways offer prizes and trophies. It was stated recently by Dr. W. B. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly in respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

James Penmore Cooper could not write without he was chewing gum. It is said.

Consider the postage stamp. It sticks until it delivers the goods.

Winpolite

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

This sun is the all-powerful life producer. Nature's universal disinfectant. A germ destroyer, as well as a stimulant and tonic. WINPOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary sunlight allows the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINPOLITE has completely satisfied the long-sought wish of health-conscious people to have conclusively proved that it is a most effective substitute for the sun's rays, and that it is a most effective substitute for the sun's rays, and that it is a most effective substitute for the sun's rays.

Indeed, the discovery of WINPOLITE has revolutionized the art of plant and chicken raising, given a new stimulus to breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, L.A.B., Toronto.

Huge Milk Shipment

Longest Consignment Of Its Kind Shipped From Ayler To Western Canada

Seven hundred and fifty thousand cans working in high gear for one solid week, could contribute just enough milk to make up a shipment which left Ayler, Ont., on a special Canadian National Railway freight recently for the west. Product of an Ayler Milk Evaporating Company it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 303 cars. There were 31,500 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,000,000 pounds of fresh milk to make up this shipment at the largest evaporator plant in Canada. The product has a value of \$65,000, and is pointed to as a striking example of the production of the dairy industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is the biggest part, for continuing throughout the winter provides.

Barcelona Train Postage

Barcelona citizens have been subjected to various taxes to help defray the enormous expenses of the International Exposition. All letters posted in Barcelona must, in addition to the regular postage, bear an exhibition stamp of five centimos (about three-quarters of an American cent). A tax of 100 centimos is levied for each long-distance call and each telegram originating there.

It is estimated that about six or seven persons out of every million are struck by lightning.

The average person consumes his weight in food once a month, which totals about 1000 pounds a year.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

The smallest distance yet measured is the distance between the atoms in a crystal of common salt. It is about one hundred-millionth of an inch.

American Farm Board Will Investigate The Wheat Situation

To Study Reason for Disparity Between American and Canadian Wheat Prices

WASHINGTON—By request of the recently created federal farm board of the United States bureau of agricultural economics has undertaken an investigation of the disparity between Canadian wheat prices and wheat prices in the northern states. To ascertain the causes of the difference the bureau has begun an inquiry into the amount and availability to country and elevator storage in the two countries; transportation charges will be a factor to be considered; the comparative quality of the wheat offered to domestic and world markets and all other influences that affect wheat in the Dominion and the United States will be examined.

Field workers are already engaged in this undertaking and price experts in the bureau at Washington are studying the economics of the situation.

The study will include examination of the price of a country shipping point in relation to prices at terminal markets; also a comparison of American terminal market prices by grades and classes of wheat, cash and future, with prices at Winnipeg.

The information to be obtained will be utilized by the federal farm board to serve as a guide in determining its future policy respecting expansion of farmer-owned and controlled storage facilities and toward co-operative marketing of wheat in general.

For Farm Relief
 The federal farm board is an organization created under the new legislation for farm relief. Its eight members sit under the chairmanship of Alex Lege, former president of the International Harvester Company and one-time manager of the allied purchasing commission. Mr. Lege retired from a similar year job to do his present work at \$15,000 a year.

The purpose of the legislation that brought the farm relief board into existence, with its \$500,000 fund being the improvement of the conditions of American agriculture, it is possible now, after three months of action, to examine the processes by which it is seeking that objective.

"The board believes," Chairman Lege states, "that it can be of the greatest assistance to American farmers by encouraging the development of large-scale central co-operative organizations. Such agencies by themselves would be, because of their prestige and influence, stabilizing elements in marketing."

Co-Operative Action
 The board hopes to assist American farmers to enter into co-operative action as this is understood by the Canadian wheat pools. The main difference between the Canadian and the United States situation is that in Canada the co-operative farmers have practically wholly financed their own corporations; in the United States the government has put a fund of half a billion dollars at the disposal of the farm board for auxiliary financing, in addition to what farmers do for themselves through their own banks.
